

ANUP SUDHAKAR MANE

C++ Software Engineer | Graphics Programming | Systems Development

Pune, Maharashtra | +91 9518789095 | anupmane14s@gmail.com | www.linkedin.com/in/anup-mane |

@apmane95

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of experience and a strong focus on C/C++ development, real-time graphics programming, and systems-level engineering. Proficient in OpenGL, OpenGL ES, and WebGL with hands-on experience building 3D rendering pipelines, shaders, and interactive graphics applications from scratch. Solid foundation in data structures, memory management, and performance optimization. Additional professional background in Java/Spring Boot and SQL. Seeking a C++ role in graphics, game engine, or systems development.

TECHNICAL SKILLS

Languages: C, C++, Java, SQL, Javascript

Graphics & Rendering: OpenGL, OpenGL ES, WebGL, OpenGL programmable pipeline, OpenGL GLUT, GLSL Shaders, 3D Transformations, Rendering Pipelines

Tools & Platforms: Visual Studio, Visual Studio Code, Blender, Win32 API, Git, GitLab, JIRA, Windows 10/11, Linux

Backend & Databases: Java, Spring Boot, Microservices, PostgreSQL, MySQL, SQL Server

Methodologies: Agile (Scrum), Version Control (Git), Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Consultant – Software Engineer | Capgemini (Client: Valmet) May 2026 – Present

Pune, India

- Contributed to the development and maintenance of a custom-built CRM and SRM intranet application using Java, Spring Boot, and microservices architecture, applying strong debugging and performance analysis skills transferable to C++ systems development.
- Diagnosed and resolved complex production issues, reducing system-related incidents by 40% through systematic root cause analysis and performance profiling — skills directly applicable to C++ memory and runtime optimization.
- Designed and optimized SQL queries across PostgreSQL, MySQL, and SQL Server to improve application throughput; applied data-oriented thinking to improve data access patterns.
- Collaborated within Agile (Scrum) teams using JIRA and GitLab for sprint planning, task tracking, and version control with Git.
- Maintained comprehensive technical documentation and contributed to process improvements across cross-functional teams.
- Independently developed C/C++ graphics projects using OpenGL, implementing rendering pipelines, shader programs, and 3D scene construction to strengthen low-level programming expertise.

C++ / OPENGL GRAPHICS PROJECTS

Kashmakash — <https://youtu.be/dKE-JGTnkkA?si=xr5vrX1BTDgGzsTh>

Technologies: C++, OpenGL, Win32, Programmable Pipeline | Platform: Windows 10

Picture Story – Rajmudra (Shaniwar Wada, Pune) — https://youtu.be/L_7MzOaIVdM

Technologies: C, C++, OpenGL GLUT | Platform: Windows 10

Logos – OpenGL FFP — <https://youtu.be/96q8YYoz6EE>

Technologies: C, C++, OpenGL Fixed Function Pipeline, Win32 API | Platform: Windows 10

In this Demo, I have made few Logos using basic Shapes in OpenGL FFP.

EDUCATION

CERTIFICATIONS

- Real Time Rendering – AstroMediComp (June 2023)
- Object-Oriented Programming in JavaScript ES6 – Pluralsight (2022)
- JavaScript Essentials for Beginners – Coursera (October 2022)

INTERESTS

Table Tennis, Chess, Video Gaming
